## ECO GREEN FLU ULTRA

*BROCHURE*

### DESCRIPTION

High performance antifreeze liquid, propylene glycol-based, that contains inhibitors and anti-corrosion additives, totally nitrite-, amine- and phosphate-free. It is formulated with specific organic compounds to protect, with maximum effectiveness, all metal parts of engine's cooling system.

### AUTOMOTIVE PERFORMANCE LEVELS

**ASTM D 5216**

**BS 6580**

**CUNA NC 956 -18**

**SAE J 1034**

**Renault 41-01 -001 /Q (Tipo D)**

**VWFL 774D/F**

### APPLICATIONS

ECO GREEN FLU ULTRA is recommended in cooling circuits of last generation engines, where it is required absolute harmlessness for humans and environment;

it can be also used, if opportunely diluted, in industrial cooling plants

and biogas production plants.

# PERFORMANCES

Inhibitors have exceptional stability at high temperature and during time; they ensure a long life protection of engines, also in harsh operating conditions. This protection is considerably higher than that provided from inorganic inhibitors, including those of new generation. It doesn't contain hazardous components for health.

In case of accidental loss, the product is far less harmful to the environment during its degradation period. Its reduced toxicity is therefore a clear benefit for the environment.
