## ECO GREEN FLU

*BROCHURE*

### DESCRIPTION

High performance antifreeze liquid, propylene glycol-based, that contains inhibitors and anti-corrosion additives, totally nitrite-, amine- and phosphate-free. It is formulated with specific organic compounds to protect, with maximum effectiveness, all metal parts of engine's cooling system.

### AUTOMOTIVE PERFORMANCE LEVELS

**ASTM D 5216**

**BS 6580**

**CUNA NC 956 -18**

### APPLICATIONS

ECO GREEN FLU is recommended in cooling circuits of last generation engines, where it is required absolute harmlessness for humans and environment;

it can be also used, if opportunely diluted, in industrial cooling plants

and biogas production plants.

# PERFORMANCES

Long-life anti-corrosion protection anticorrosione di lunghissima durata towards all metals. It ensures full compatibility with seals and rubber or plastic components.

It doesn't contain hazardous components for health, so it's more safety in respect of people and animals: the CEE recognizes the risks deriving from ethylene glycol and fixes maximum exposure limits (10 mg/m<sup>3</sup> vapor phase, 150 mg/m<sup>3</sup> fog phase), while there are no exposure limits for propylene glycol. In case of accidental loss this product results much less harmful for the environment during its degradation time. Its reduced harmfulness is therefore a clear benefit for the environment.
