## ANTIFREEZE ULTRA

*BROCHURE*

### DESCRIPTION

ANTIFREEZE ULTRA is a cutting-edge antifreeze, permanent type, monoethylene glycol-based formulated with O.A.T. technology and it's explicitly advised for extended change intervals. It is also recommended for all new technology engines, where it is fundamental to protect aluminum parts at high temperatures.

### AUTOMOTIVE PERFORMANCE LEVELS

**RENAULT 41-01-00/Q [tipo D]**  
**VW TL 774 D/F**  
**CUNA 956-16 [Gennaio 2012 ]**  
**AFNOR NF R 15-601**

**ASTM D 3306**  
**SAE J-1036**  
**BS 6580**

### APPLICATIONS

ANTIFREEZE ULTRA is recommended in cooling circuits of last generation engines where aluminum and its alloys are more and more used.

It can be also used, if opportunely diluted, in industrial cooling plants.

# PERFORMANCES

Corrosion protection towards all metals, particularly suitable for aluminum and its alloys.

Outstanding anti-oxidant e anti-encrusting characteristics, that ensure a perfect heat exchange, also with hard water.

High anti-foam capacity, thanks to a specific additive.

Fully compatible with seals and rubber or plastic components.

Protection against cavitation and consequent erosion risks.

Its special formulation, without silicates, amines, nitrites, boron and phosphates, emphasize the attention to environment respect.

Frost protection, at different concentrations in water, as shown in the following table:

ANTIFREEZE ULTRA %vol	20	30	35	40	50
WATER %vol	80	70	65	60	50
PROTECTION TEMPERATURE °C	-9	-17	-21	-25	-36

## CUSTOM PACKAGES AVAILABLE

20 AND 25 LITERS CANISTER

200 LITERS DRUM

1000 LITERS CISTERN

TANK TRUCK
